

AMIYA KRISHNA CHAURASIYA

Full Stack Developer (MERN / Next.js) | Aspiring Software Development Engineer

Lucknow, Uttar Pradesh, India | +91 9305559247 | amiyakrishna04@gmail.com

Portfolio: amiya-krishna-portfolio.vercel.app | [LinkedIn: linkedin.com/in/amiya-krishna](https://www.linkedin.com/in/amiya-krishna) | [GitHub: github.com/Amiya-Krishna](https://github.com/Amiya-Krishna)

PROFESSIONAL SUMMARY

Computer Science undergraduate (3rd year, B.Tech CSE) with hands-on full-stack software development experience building production-style web applications using the MERN stack and Next.js. Skilled in designing scalable REST APIs, secure authentication systems, and real-time features with Socket.IO. Experienced integrating third-party APIs (OAuth2, AI APIs), relational and NoSQL database design (PostgreSQL, MongoDB, Prisma ORM), and deploying live full-stack applications on Vercel and Render. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and System Design. Seeking a Software Engineering / Full Stack Developer internship.

EDUCATION

Institute of Engineering & Technology (IET), Lucknow

Expected 2028

B.Tech in Computer Science & Engineering — CGPA: 7.85 / 10

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, Java, C++, SQL, HTML5, CSS3
- Frontend: React.js, Next.js (App Router), Tailwind CSS, Vite
- Backend: Node.js, Express.js, REST API Design, Zod Validation, Socket.IO
- Databases & ORMs: MongoDB, PostgreSQL, Prisma ORM
- Integrations: Chrome Extensions (Manifest V3), Gmail OAuth2 API, Groq AI API, Resend Email API
- Tools & DevOps: Git, GitHub, Postman, Vercel, Render, VS Code
- Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, System Design

KEY PROJECTS

Job Application Tracker Portal (TrackTrail)

React 19, Vite, Node.js, Express 5, PostgreSQL, JWT, Tailwind CSS, Chrome Extension (Manifest V3)

GitHub: github.com/Amiya-Krishna/Job-Application-Tracker-Portal | Live Demo: job-application-tracker-portal-ten.vercel.app

- Built a full-stack job application tracking system with a Chrome Extension and Gmail OAuth integration to automatically capture and structure job data from job sites and recruiter emails
- Designed secure REST APIs with JWT authentication and enforced per-user data isolation, preventing IDOR vulnerabilities
- Designed backend to handle 500+ job records with optimized PostgreSQL queries, reducing API response time by ~30%
- Developed an analytics dashboard with filtering, sorting, and CSV export, improving usability for job tracking workflows
- Integrated external data pipelines (LinkedIn/Indeed capture + Gmail parsing) to automate manual job-tracking effort

College Discovery Platform

Next.js, React 19, TypeScript, Prisma ORM, PostgreSQL, Zod, JWT, Tailwind CSS

GitHub: github.com/Amiya-Krishna/college-discovery | Live Demo: college-discovery-vert.vercel.app

- Developed a scalable college search platform with advanced filters (location, fees, ranking) and side-by-side comparison of up to three colleges
- Designed a relational schema using PostgreSQL and Prisma ORM with indexed lookup fields, improving search and query performance
- Implemented a secure authentication system using JWT with HTTP-only cookies and a transactional password-reset email pipeline
- Built an AI-assisted recommendation and prediction system using the Groq API with server-side validated request handling (Zod)
- Built responsive UI with React + Tailwind and integrated APIs with proper error/loading states

Community Discussion Forum with Real-Time Chat

React 18, Node.js, Express, MongoDB, Socket.IO, JWT Authentication

GitHub: github.com/Amiya-Krishna/Community-Discussion-Forum-with-Real-Time-Chat | Live Demo: community-discussion-forum-with-rea-roan.vercel.app

- Built a MERN-based community platform combining threaded discussions with real-time chat using Socket.IO
- Implemented an event-driven architecture supporting concurrent users with live messaging, typing indicators, and notifications
- Designed a scalable backend with pagination, infinite scroll, and optimized message handling
- Developed rich-text posts, multi-emoji reactions, @mentions, and image uploads to increase user engagement
- Secured APIs using JWT authentication and middleware-based route protection

EXPERIENCE

Software Development Intern (Virtual) — Bluestock Fintech

December 2025

- Reduced manual workflow effort by ~40% by automating internal Python-based processes
- Collaborated using Git-based workflows, resolving issues and improving code quality through refactoring
- Worked across multiple modules following SDLC practices in a team environment

Professional Development Program Trainee — Wadhwani Foundation

April 2025

- Completed a 113-hour structured training program focused on workplace readiness and analytical problem-solving
- Strengthened critical thinking, professional communication, and cross-functional collaboration skills

ACHIEVEMENTS & DSA

-
- Solved 200+ Data Structures & Algorithms problems across arrays, graphs, trees, and dynamic programming
 - 1st Rank in Class 12 Board Examinations
 - Winner, Institutional Public Speaking Competition

CERTIFICATIONS

-
- Artificial Intelligence & Python for Data Science — IIT Delhi (EDC)
 - Full Stack Development & DSA — IIT Delhi (EDC)

ADDITIONAL

Languages: English, Hindi
